

What does it mean to be **GREEN**?

Inviting all Soil Conservation District technical staff to a training session designed to update them on what being “green” will mean for soil and sediment erosion control in New Jersey as we enter 2021.

WHEN: November 16, 2020

TIME: 12:30 PM – 2:30 PM

- After the Morning Session of the NJACD Annual Meeting

This event is being hosted and organized by the Ocean County Soil Conservation District on behalf of the New Jersey Association of Conservation Districts and the State Soil Conservation Committee’s Training Committee. Participants will be provided with certificates for 2 hours professional development credits. This course also counts toward Professional Engineer credits. This session will be recorded.

This session will provide an update on the NJDEP Stormwater Rules and the implementation of GREEN INFRASTRUCTURE set to be effective March 2, 2021. Participants will be given an update on the rules and additional details by NJDEP, as well as insight into the perspective from site design and the construction community on how the updated BMPs will be put into practice on the ground.

This session will be moderated by John Showler, NJSSCC State Engineer, who will provide additional guidance and direction on how these rules will impact New Jersey’s soil conservation districts regarding plan review and inspections and soil erosion and sediment control in the state.

Presenters:

Gabriel Mahon, Bureau Chief, Nonpoint Pollution Control, Division of Water Quality

Jeromie Lange, Senior Principal, Maser Consulting & Director of Development, Active Acquisition, LLC
